

Here is Marie's tree and what she says about it:

It took my husband and I together to carry the tree upstairs into the living room because it is so heavy. Purchased at Costco last year on sale at what we thought was a good bargain to find out 2 weeks later it was on a further sale in Leduc. So out we went to get the price match. It was meant to be. It now sports over 1000 ornaments. No room for garland. My ornaments come from as far away as Nepal and Disneyland. One can never have too many and I still manage to bring one or two more every year that I find in my travels through second hand stores or from family members.

Here is my 2020 Christmas tree.
We have been collecting ornaments for over 40 years
from all over the world on our travels. Tree is
9 ft high and is retractable with a push of a button.
Merry Christmas to all. Roger Martens

- WELCOME
TO OUR
HOME.
